

*Short biography, Anna Blechingberg*

Anna has studied both music and mathematics, and has worked as a choir conductor, pianist and music teacher. She has also founded and headed TENK (THINK), a recruitment program for science studies in Oslo, Norway. The main ideas of TENK is carried on into the national science recruitment program ENT3R. Anna is currently a PhD-student in Applied Mathematics/Biomechanics at both the Institute of Forensic Medicine at the University of Oslo, and at Simula Research Laboratory in Lysaker, Norway, where she makes numerical simulations of head injuries. She is also a member of the “ALFA Role Model Bureau” where she works with inspiring youths into science studies. She is also interested in creativity, and plays a bit with programming issues in the evenings.
